

AI-Powered Productivity Assistant

Automating Everyday Workplace Tasks with Smart AI

Agenda

01

The Problem

Why professionals need this solution

02

The Solution

What we built and how it works

03

Key Features

Email, Meeting Notes & Task Planner

04

How to Use It

Simple 3-step process anyone can follow

05

Responsible AI & Impact

Ethics, limitations and real value

The Problem

Professionals waste hours every week on repetitive tasks

Email Writing

5–15 min each

Drafting professional messages with the right tone

Meeting Notes

15–30 min

Turning long discussions into clear action items

Daily Planning

10–20 min

Deciding what to do first and how to organize the day

The Solution: ProductivityAI Assistant

A ready-to-use AI assistant that works inside any chatbot (ChatGPT, Claude, Grok, Gemini...)

1

Paste System Prompt

Copy the special instructions once into the AI chat

2

Ask in Normal Language

Write what you need like you would tell a colleague

3

Get Ready-to-Use Output

Receive structured, professional results in seconds

Three Core Features

Smart Email Generator

- Context-based professional emails
- Tone options: formal, friendly, persuasive
- Adapts to audience (client, manager, team)

Meeting Notes Summarizer

- Turns long notes into short summaries
- Extracts key points & decisions
- Lists action items + owners + deadlines

AI Task Planner

- Creates daily or weekly plans
- Prioritizes by urgency × importance
- Suggests best time order & focus blocks

How to Use It (Very Simple)

Step 1 – Paste this System Prompt once into any AI chat:

You are ProductivityAI, a professional workplace assistant. Help users write better emails, summarize meeting notes, and plan tasks. Always be clear and practical. For emails: ask for missing details if needed. For notes: extract Key Points, Decisions, Action Items (owner + deadline). For plans: prioritize by urgency + importance. Always remind the user to review AI outputs before sending or acting on them.

Step 2 – Then just ask normally. Examples:

“Write a formal email to my manager asking for two days leave next week.”

“Summarize these meeting notes and list the action items.”

“I have these 6 tasks for tomorrow – create a prioritized daily plan.”

Example Output – Meeting Notes Summarizer

Key Points

- Q3 sales exceeded target by 12%
- New product launch delayed to November
- Customer support team needs two more agents

Decisions Made

- Approved extra budget for marketing campaign
- Agreed to hire two support agents by end of month

Action Items

1. Sarah – Finalize job adverts → Deadline: 10 Sep
2. Mike – Prepare marketing brief → Deadline: 12 Sep
3. Team – Review new support process → Deadline: 15 Sep

Responsible AI Practices

Always Review

Every output includes a reminder: “Please review and edit before sending or using.”

No Hallucinations

Prompts force the AI to use only the information the user provides – no invented facts.

Transparency

The assistant clearly states it is AI and can make mistakes.

Privacy First

No sensitive data is stored beyond the current conversation.

Productivity Impact

5–10×

Faster Email Drafting

From 10 minutes to under 1
minute

80%+

Less Time on Notes

From 20 minutes of writing to
2 minutes of review

Clearer

Daily Priorities

Less decision fatigue, better
focus
